INTEGRA SOFTWARE SYSTEMS EXPANDS INTO CONSUMER & COMMERCIAL LENDING SOFTWARE WITH ACQUISITION OF FCC

A leader in mortgage loan origination software, [INTEGRA Software Systems](#) has acquired the assets of FCC (Financial Compliance Corporation, formerly Financial Computers Corporation). “We are finding that more lenders, especially banks, want one software partner to handle their overall lending processing needs. With the acquisition of FCC, INTEGRA is jumping another step ahead of its mortgage software competitors,” says Jerry Pratt, President of [INTEGRA](#).

Adds [Tim Bartek](#), Senior Vice President, Sales-Marketing for INTEGRA, “This acquisition is going to be a tremendous, immediate complement to our [Destiny mortgage loan origination](#) system which is among the most robust in the industry. Now, we can also address lenders’ other software needs – beyond residential mortgages. Our newly acquired, market-proven WinBanker and WinDeposit products completely automate processing of any consumer loans such as for autos, boats, RV’s, airplanes; “skip (or irregular) loans; and other personal loans. In addition, we can now offer banks complete software processing of commercial and agricultural commercial loans. With this acquisition [INTEGRA](#) has become the one-stop shop for lenders of all sizes seeking a single software processing partner with the ability to service lenders’ overall consumer and commercial channels, in addition to [our traditional mortgage channels](#).

Jim Williams, formerly President of FCC, has joined the [INTEGRA](#) team and brings over 30 years of experience in software development for banks and other lenders. “We’ve had a solid track record with over 200 bank clients, but competing with the likes of [INTEGRA](#) and others made it tough in the area of residential mortgage loan processing. WinBanker and WinDeposit focus a lot more on the other aspects of consumer and commercial lending and deposits, including the automated production of coupon books and checks. Plus we’ve got other outstanding features such as automated signatures that eliminate the need for multiple scans -- and save a lot of time in all types of loan processing. Joining forces with [INTEGRA](#), I believe is really going to give the company a big advantage in the highly competitive lending software marketplace. Now we’ve got the full gamut of software that banks and other lenders need.”

[INTEGRA](#) will immediately begin marketing WinBanker and WinDeposit as standalone products to lenders nationwide. The company also eventually plans to integrate key features and functionality into the company’s flagship [Destiny software](#).

About INTEGRA Software Systems, LLC

Established in 1996, [INTEGRA](#) partners with mortgage lending clients – medium to large sized banks; brokers; credit unions; retail, wholesale, and sub-prime lenders – to provide each of them a competitive advantage with a loan origination system (LOS) tailored to their specific needs. [INTEGRA](#)’s [Destiny LOS](#) spans point-of-sale through post-closing and secondary marketing for lenders interested in efficiencies gained from automating every step of their mortgage loan workflow. [Destiny](#) wraps around a lender’s particular business model and each of their business channels: Retail, Wholesale, Correspondent, Internet, Affinity, Telemarketing and Employee Loan. [INTEGRA](#)’s recent acquisition of FCC now extends the company’s mortgage software offerings into complementary software for consumer lending and commercial lending processing.
